### Healing relationships through developing restorative practices

& Sports College  
Training School Event

## Key Note Speaker

### Dr Belinda Hopkins Transforming Conflict

Dr Belinda Hopkins is the Director of Transforming Conflict. She pioneered the application of restorative principles in school settings in the UK in the late 90's and developed the first training course specifically developed for teachers. All this pioneering work was disseminated through many published articles and eventually as a book - 'Just Schools'- which is referred to by some as 'the bible' in the field.

In order to remain at the cutting edge of developments in the field Belinda has spent the past six years researching the experiences of those who have been implementing restorative approaches in their schools. The results form the first doctoral thesis in this field, and will soon be turned into an accessible practical book for senior managers and project leaders.

Belinda is not only an expert in her field that has already worked with schools and children's services in Kent and the rest of the UK, but also an inspiring speaker who will be on hand throughout the day, later facilitating the 'World Cafe' element of the conference programme.
